Address:

4416 W. 30th Street, Sw, Greeley

Price:

100.00 \$

An 8-ohm two-way loudspeaker system designed to reproduce the full range of musical frequencies with exceptional smoothness and freedom from distortion. The low-frequency driver is a twelve-inch acoustic-suspension mechanism mounted in a tightly-sealed imitation walnut cabinet. The high-frequency is a 1-5/8" direct radiator capable of excellent dispersion-a good high-frequency reproduction in any listening room and is adjustable by the 3-way switch. The speakers will match within 1-1/2 db over the entire frequency range.
