Address:

2311 Falcon Ct., Owensboro, Owensboro

Price:

50.00 \$

The RK3441K compact circular saw can essentially replace a mulcher's or professionals need for a full-size 7-1/4 In. circular saw. This saw was born to cut wood, especially 2 In. final lumber materials. This saw weighs only 5 lbs, so it is easy to transport and maneuver (especially overhead). The slim, infeed grip design provides great comfort, balance, and control. The 41/2 In. blade cuts 2X4s in a single pass and is about 50% lighter than conventional 71/4 In. circular saws. Plus, the lightweight saw's left-sided blade design provides remarkable cut-line visibility. The saw's 4-1/2 In. blade has a kerf that is less than half the thickness of larger 7-1/4 In. circular saw blades. Since this smaller, thinner blade takes much less effort and motor strain to cut through the material, the 5 Amp to 3500 rpm saw can match the performance of full-size circular saws. The saw's maximum cutting depth at 900 is 1-11/16 In. and the bevel capacity at 450 is 1-1/8 the saw also features a dust extraction port and a 1-1/4 In. vacuum adapter for dust collection.
